Router

Express Router

- Chapter 3

How to structure routes

app.route("books/scifi)

.method

```
app.route('/books/scifi/:bookid')
.get((req, res, next) => {
res.send(`<h1> SCIFI ${req.params.bookid} </h1>`);})
.put((req, res, next) => {});
```

Regular Expressions

- Chapter 3
- You can use regular expressions in routes

Move into route file

- Create routes folder

```javascript
"use strict";

const express = require('express');
let router = express.Router();

module.exports = router;

router.use((req, res, next) => {
    console.log(req.url, Date.now());
    next();
});

router.route('/scifi')
.get((req, res, next) => { res.send('<h1> SCIFI </h1>'); })
.post((req, res, next) => { });

router.route('/scifi/:bookid')
.get((req, res, next) => { res.send(`<h1> SCIFI ${req.params.bookid} </h1>`);})
.put((req, res, next) => {});
```

```javascript
const express = require('express');

const app = express();

const books = require('./routes/books');

app.use('/books', books);
```
